

Two Decades of the ACL Anthology

Development, Impact, and Open Challenges

Marcel Bollmann, Nathan Schneider, Arne Köhn, Matt Post

- The ACL Anthology is developed in a **public Github repository**.

 github.com/acl-org/acl-anthology/

- It's mostly volunteer-driven & powered by **Python** and **Hugo**.
- All **metadata** is stored in the repo in XML and YAML formats.
- There's now a new **Python library** for accessing this metadata easily!

 `pip install acl-anthology-py`
